## BELLA SALON & SPA CREATING 'EVERYDAY MIRACLES'

When Bella Salon and Spa opened its doors — just after the sobering tragedy of September 11, 2001 — owner Tammy Shindle realized that while a salon may

*"Feeling comfortable with the staff is important for a guest, and we've created a culture at Bella Salon and Spa that allows for just that."*

not save the world, we can help people feel better. "My father-in-law, Glenn Shindle, presented me with this wonderful opportunity to start my own business. In my vision, I wanted to offer guests a place where they could receive great service, relax and feel good about themselves," says Tammy.

In a relaxed setting inspired by the colors and ambiance of an Italian villa, guests can unwind with spa treatments such as the Spa Siesta — a 30-minute revitalizing facial followed by a 30-minute Swedish massage — or the Mama Mia, a manicure with paraffin hand treatment and choice between a 30-minute facial or massage. Other spa packages include treatments like Respiro (Italian for "breathe") and the Bella "Day of Beauty" — a full day of customized pampering.

The salon offers high-end hair care — including custom coloring/foiling, styling and specialized services such as straightening or texturizing. Bella also carries a full line of quality products like Bioelements skin care, Pureology, Redken and L'ORÉAL hair care products. To stay on the cutting edge of trends and techniques, staff members are provided with on-going training, both in-house and at various seminars.

### BELLA SALON & SPA

"We feel education is very important to provide the highest quality of service to our clients," says Tammy.

The well-trained, friendly staff help guests feel confident and at ease in the salon and spa. "Feeling comfortable with the staff is important for a guest, and we've created a culture at Bella Salon and Spa that allows for just that," says Tammy. "We have the opportunity to be day makers in our industry, and I am honored to be a part of that!" ●
